

# Zero Oil

Knorr-Bremse was the first company in rail to introduce innovative oil-free compressor technology. This now proven product is a winner both for the environment and for the train operator, with no oil changes, oil separation and condensate to worry about. The Knorr-Bremse oil-free compressor also uses less energy, weighs less and also requires a smaller installation space than a conventional compressor. Knorr-Bremse, delivering high performance, high speed solutions around the world. | [www.knorr-bremse.co.uk](http://www.knorr-bremse.co.uk) |
